

Arbre ascendant 7 générations

TERRIER Edmée

The diagram is a horizontal tree structure. At the far left, a box contains the name 'TERRIER Edmée'. From this box, a vertical line extends upwards and then branches into two horizontal lines, representing the first generation of children. Each of these children further branches into two more children in the second generation, and so on, creating a binary tree structure. The boxes for the children are arranged in a staggered, descending pattern from left to right. The tree continues for seven generations, with the final generation consisting of 128 boxes. The boxes are empty, intended for names and dates.
