

Arbre ascendant 7 générations

Penhouet Jacquette

The diagram is an ancestry chart starting from a single individual, Penhouet Jacquette, at the 0th generation. From this individual, two lines descend to the 1st generation, which consists of two empty rectangular boxes. Each of these boxes then branches into two more boxes in the 2nd generation, resulting in four boxes. This pattern of binary branching continues through the 3rd, 4th, 5th, and 6th generations, creating a total of 128 empty rectangular boxes at the 7th generation. The boxes are arranged in a staggered, tree-like structure, with each level having twice as many boxes as the previous level. The boxes are empty, indicating that the names and other details of the descendants have not yet been entered.
