

Arbre ascendant 7 générations

JOANILLION Caterine

The diagram is an ancestry chart starting from a single individual, Caterine JOANILLION, at the 0th generation. From this individual, the chart branches into two paths. Each path continues to split into two at each subsequent generation, creating a binary tree structure. The chart is organized into seven vertical columns, each representing a generation. The first column contains the root individual. The second column contains two individuals. The third column contains four individuals. The fourth column contains eight individuals. The fifth column contains sixteen individuals. The sixth column contains thirty-two individuals. The seventh column contains sixty-four individuals. Each individual is represented by a rectangular box. The boxes in the later generations are smaller than those in the earlier generations. The boxes are arranged in a staggered, zig-zag pattern from left to right across the generations. The text 'JOANILLION Caterine' is written in blue font inside the box for the root individual.
