

Arbre ascendant 7 générations

LECOMTE Elisa +1871

The diagram is a horizontal ancestral tree. The root node on the left is a box labeled "LECOMTE Elisa +1871". From this root, two lines branch out to the right, representing her children. Each child node further branches into two more nodes, representing grandchildren. This pattern continues for three more generations, resulting in a total of 128 leaf nodes at the 7th generation. The nodes are represented by empty rectangular boxes, with the root node containing the name and date. The tree is drawn with black lines on a white background.
