

Arbre ascendant 7 générations

ROBERT Marguerite

The diagram is an ancestry chart starting from a single individual, ROBERT Marguerite, at the bottom. From him, the lineage branches out into two main paths. Each path continues to branch out into two sub-paths at each subsequent generation, creating a total of 128 potential descendant slots by the 7th generation. The chart is organized into 7 vertical columns representing generations. The first column contains the root, ROBERT Marguerite. The second column contains two boxes, the third contains four boxes, the fourth contains eight boxes, the fifth contains sixteen boxes, the sixth contains thirty-two boxes, and the seventh contains sixty-four boxes. Each box is connected to its parent(s) by lines that branch out from the bottom of the parent box to the top of the child box(es). The boxes are empty, providing a template for recording names and other details of the descendants.
