

Arbre ascendant 7 générations

SAGNER Marie

The chart is a vertical tree structure. At the top is a box labeled 'SAGNER Marie'. From this box, a vertical line descends and branches into two horizontal lines. Each horizontal line leads to a box representing a child. This process repeats for each generation, with each box branching into two horizontal lines leading to two more boxes. The boxes are arranged in a staggered, descending pattern from left to right. The right side of the chart is filled with a grid of empty rectangular boxes, representing the names and details of the individuals in each generation. The boxes are organized into columns that correspond to the individuals in the tree. The overall structure is a binary tree with 7 levels of branching, starting from a single root node.
